Authors: Gail Wright, Staff Archaeologist,

Firm: County of San Diego

Report Date: May 13, 2010

Report Title: *"Cultural Resources Survey for the Kenyon Minor Subdivision, TPM 20857, Log No. 04-15-002, APN 410-021-25 and 410-020-77; Negative Findings"*

Type of Study: Archaeology Survey

New Sites: None

Updated Sites: SDI-5809 and SDI-5810 are shown on GIS as being within the project area; however, both sites consist of bedrock outcrops and no outcrops are located in the project area that will be developed. They may be closer to Pine Creek, but that area will be placed in open space, and was not surveyed.

USGS Quad: Descanso

Acreage: 15.88 acres

Key Words: Pine Valley, Negative Findings, Kenyon Property

RE: Kenyon Project TPM 20857 Cultural Resources Survey - Negative Findings

Please be advised that a survey has been conducted on the above referenced project. It has been determined that there are no cultural resources present on this property. The project has been plotted on the attached Descanso USGS 7.5 minute topographical map for your information.

County: San Diego

USGS 7.5' Quad: Descanso Date: 1997; Section: 25 Township: 15S; Range: 04E

Address: 8579 Pine Creek Road
City: Pine Valley; State: CA 91962

Thomas Brothers: 1237B4

Other Locational Data: Pine Valley Community Planning Area, unincorporated portion of San Diego County

Assessor Parcel Number(s): 410-021-25-00 and 410-020-77-00

Elevation: 3635 - 3660

Owner and Address: Charles Kenyon; P.O. Box 1118, Pine Valley CA 91962

Survey Type: Intensive Pedestrian

Date of Survey: May 13, 2010

Field Crew: Gail Wright, Diane Buell, Carmen Lucas (Native American monitor) *

Description: The field survey was conducted using standard archaeological procedures and techniques. For the most part, continuous parallel transects (10 meters) were walked in a north/south direction. Survey conditions in these areas were good to fair, with some areas partially obscured by ground cover in the form of a grassy meadow. In areas possessing dense vegetation, the survey methodology was adjusted to accommodate surface examination. No bedrock outcrops were found on the property; however Pine Creek runs through the property north to south. The stream, stream bed and flood plane will all be preserved in open space and not developed. No artifacts or features were identified during this survey with the exception one historic isolate - the top of one rusted aluminum can (refer to attached photograph and Primary

* Note: Carmen Lucas, a lineal descendant of the local Indians, visited the site at the request of staff archaeologist Gail Wright and volunteered to stay to assist with the survey.

Record DPR form). This project proposes to develop approximately 16 acres into four residential lots, one of which is already developed.

Prior Research: Staff conducted a records search of the surrounding area using the California Historic Resources Inventory System (CHRIS). Twenty-six studies (including both historic and prehistoric) have been conducted within a one mile radius and 41 sites were identified and recorded. They are described as historic archaeological sites and prehistoric camping and resource procurement sites; one historic structure was also identified within the one-mile radius. Several of these sites are in close proximity to the subject property. The GIS maps show two sites within the subject property: SDI-5809 and SDI-5810. Both sites appear to be miss-located. SDI-5809 consists of a bedrock milling feature and there is no bedrock located in the areas to be developed on the site. SDI-5810 consists of various lithics among prominent boulders and defined by washes on the SE and a dirt road on the north. Again, there are no boulders on the Kenyon property.

Because of the number of significant archaeological resources in close proximity of the project, monitoring by an approved archaeologist and a Kumeyaay Native American monitor will be required during all site grading.

Native American Consultation: A Sacred Lands check request was initiated May 13, 2010 with the Native American Heritage Commission (NAHC). When a response is received from the NAHC, staff will contact the Native American groups and individuals provided by the NAHC to further investigate whether they have knowledge of Sacred Lands occurring on the subject parcels. Staff will keep you fully informed as to any communication with the local tribes.

If you have any questions, please contact me at (858) 694-3003.

Sincerely,

Gail Wright

The isolate is the top of a rusted aluminum can that, based on size and shape, appears to be a beer can. The first all-aluminum beer can appeared in 1959; it was opened with a "church key." No other historic artifacts were found on the property. The can top is completely rusted with no identification markings. Samples from 1935 through 1959:

Re: Tribal Consultation Per Government Code §§ 65352.3, 65352.4 and 65560 (SB 18/Sacred Lands File Search) for Project- Pre-planning Outreach for Kenyon TPM 30857; Log No. 04-15-002, a Residential Development; located on approx 16-acres in the Pine Valley Community; San Diego County, California

Dear Ms. Wright:

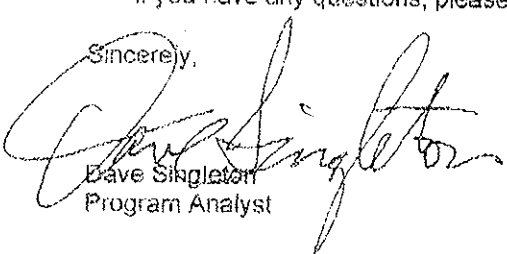

Government Code §65352.3 and .5 requires local governments to consult with California Native American tribes identified by the Native American Heritage Commission (NAHC) for the purpose of protecting, and/or mitigating impacts to cultural places. Attached is a Native American Tribal Consultation list of tribes with traditional lands or cultural places located within the requested plan boundaries.

As a part of consultation, the NAHC recommends that local governments conduct record searches through the NAHC and California Historic Resources Information System (CHRIS) to determine if any cultural places are located within the area(s) affected by the proposed action.

A NAHC Sacred Lands File search was conducted based on the project site information included in your request and no Native American cultural resources were found within the 'area of potential effect' (APE) you identified. There are however, Native American cultural resources in close proximity to the APE. Local governments should be aware that records maintained by the NAHC are not exhaustive, and a negative response to these searches does not preclude the existence of a cultural place. A tribe may be the only source of information regarding the existence of a cultural place. I suggest you consult with all of those on the accompanying Native American Contacts list, which has been included separately. If they cannot supply information, they might recommend others with specific knowledge about cultural resources in your plan area. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you have any questions, please contact me at (916) 653-6251.

Sincerely,

Dave Singleton
Program Analyst
